Tip or Complaint:		Paris Kentucky has turned conservation land into industrial land. They changed Stoner Creek Golf Course along Stoner Creek. They are planning on building a distillery and will destroy a lot with it. They will have to fill in some small wetlands and will build up along Stoner Creek. That will cause a flood zone that will destroy the banks of Stoner Creek along with the life around them. It will also fill the water with dirt and mud that is drinking water for the environment of many counties along with the city. The floods at already bad enough for worry. A couple years ago the erosion collapsed the one wall and brought the train tracks down. This will be way worse with the floods. There may also be waste from the distillery dumped into the water. They have a deadline to start building, which is in a couple months and nobody has done any studies on how it will effect the environment except for finding the flood zone. No one has looked into how the environment will be damaged. There is a lot of industrial land in the industrial park that they can use, yet this land is going to be destroyed. A lot of life and environment will be destroyed if this happens. The location is 38 East Main Street Paris Kentucky. There are many Herald Leader articles that can be found about it. Sorry, the pictures are not working on here.
